

MidPoint Community Meetup 2025

Streamlining Reporting and Data Export in midPoint

Challenges

Reports

- Two separate report paths which are not unified
- Complicated terminology across the reporting process
- Overwhelming forms
- Over-dependence of reports on tasks
- Complex scheduling of report for basic users
- Difficult data selection
- Poor feedback and progress visibility

Suggested improvements

Reports

- Unification of report functions
- General UI remaster and better information distribution
- Wizard style integration of creation process
- More available scheduling
- Taking Tasks closer to Reports when in context of Reports
- Better feedback through Notifications and Active jobs

Demonstration

Note: This is a prototype, inconsistencies/errors may appear
